

Ammonia/Acid Filtration

IQAir GC or GCX

Available either with the IQAir GC or GCX models, control of contaminants such as ammonia or acids is possible through these specially blended cartridges, called either AM or AcidPro.

AM (Ammonia): for situations where excessive ammonia is produced such as with pets, rodents, birds, toilets, wet rooms, etc.

AcidPro (acids): for situations where soluble acids are a contaminant and need removal, such as hydrogen sulfides, sulfur dioxides, chlorine, sulfuric acids, etc

OZONE GENERATOR

Recommended for use against powerful odours and gases:

- Deodorisation: eliminates mould, tobacco smoke, toxins
- Air purification and sterilisation - oxidizes, disintegrates and neutralizes assorted gases and substances such as carbon monoxide, carbon dioxide, methane and benzene etc.
- Sterilisation: retards and kills assorted bacteria and viruses such as mould, cold virus and tubercle bacillus.
- Oxygenates: increases oxygen levels
