

PF40 – Coarse Dust Filter

Product Summary

For environments with elevated levels of coarse dust, the PF40 kit can be added to any IQAir system for superior coarse dust filtration. This helps to extend the life of the unit's standard pre-filter element.

Installation

The PF40 kit consists of an upper grille which screws into the filtration device's base. A synthetic coarse dust filter pad is held in place by a lower grille that is secured by four clips. The 12.7mm (0.5") deep non-woven design of the PF40 filter pad ensures superior coarse dust holding capacity.

IQAir Compatibility

Compatible with all IQAir room air purifiers. Not compatible with the accessories FlexVac, VM FlexVac, VM InFlow and InFlow W125.
